

Care and Maintenance

Your new garden furniture is a natural timber product. In order that you may prolong the life of this product we recommend that you follow the general care and maintenance advice below.

All fixings to be checked for tightness and signs of deterioration at the beginning of each season and on a regular basis.

Product should be checked regularly and **re-coated only with a suitable water-based topcoat finish** when required. If accidental damage occurs lightly sand and re-coat with a suitable water based wood preservative. Product can be cleaned periodically with a **mild soapy detergent**.

This is a natural product and therefore colour may vary slightly from piece to piece.

As a natural product it is possible that knots can work loose and sometimes fall out, also resin leakage and small cracks can appear on the woods surface. Should this happen, clean off resin, ensure any sharp edges are sanded smooth and recoat.

Products should be given suitable protection from adverse weather conditions, particularly during the winter months.

Please retain these instructions for future reference and use.

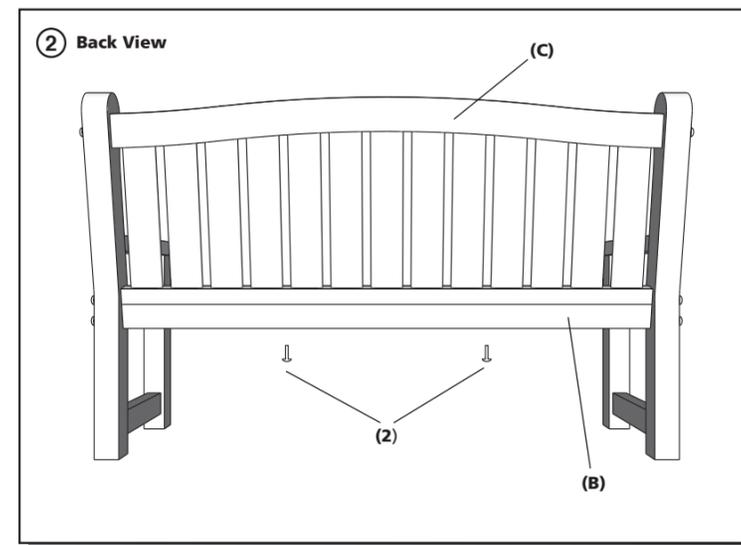

Diagram 2

Fit seat assembly **(B)** to seat back **(C)** using 2 x fixings **(2)**.

Before you start

- Check the fixings pack and make sure you have all of the parts listed above. If not call our helpline
- Use cardboard packaging to protect surfaces during assembly
- Only tighten fully when all components are aligned in place
- Always sight on firm level ground
