INST-ETH313 03.07.2019 Please read all of the instructions before installation.

General

Methven recommends this product is installed by a competent person in compliance with all relevant regional regulations.

After installation all connections must be checked for leaks.

All outlets used primarily for personal hygiene shall deliver water at a safe temperature as per regional regulations.

It is the responsibility of the installer to ensure a waterproof seal is achieved.

Tap Installation Instructions

 Fit the base ring onto the bottom of the tap body the raised edge of the base ring sits inside the lip on the base of the tap with the rubber washer facing the basin.
 Insert the fixing bolt into the bot-

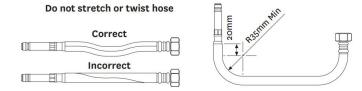

tom of the tap, with the slot facing out and using a flat bladed screwdriver tighten this up.

3) Screw the flexible tails into the bottom of the tap, by hand, until tight. Do not use PTFE tape, or similar, on the threads.

4) Feed the tails and fixing bolt into the hole in the basin, ensuring that the base ring and rubber washer are seated correctly and fully covering the hole.

5) From the underside of the basin feed the rubber horseshoe shaped washer over the fixing bolt followed by the metal one. Place the nut over the fixing bolt and tighten until the tap is fixed on the basin. Do not overtighten.
6) Connect the hot and cold feeds to the water supply.
7) Poinstate the water supply and test

7) Reinstate the water supply and test for leaks.

DO NOT crush Hose or swaged Ends
