1 MOONAP

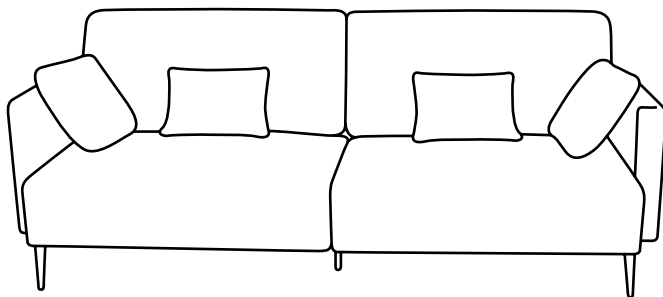

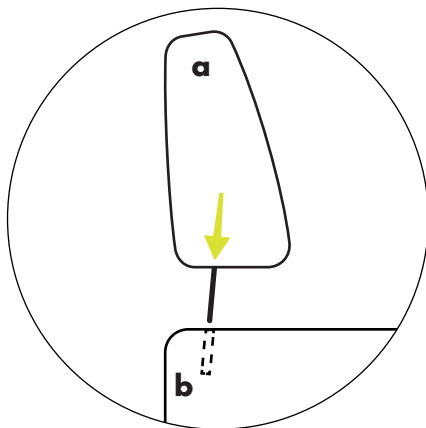

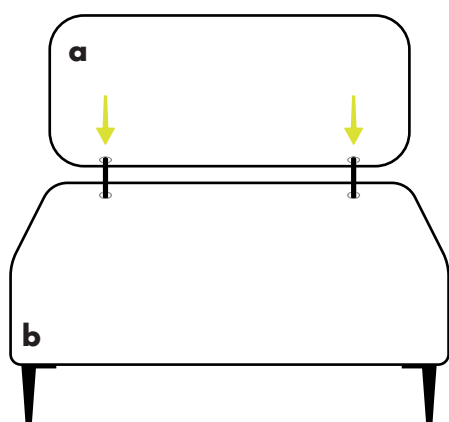

ASSEMBLY INSTRUCTIONS

1

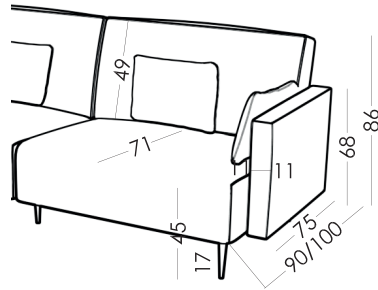

TECHNICAL
INFORMATION

Frame:	Frame of pinewood and MDF
Seat suspension:	Webbing N.E.A
Back suspension:	Metal bracket
Seat:	40Kg Polyurethane fi re resistant
Back cushion:	28Kg Polyurethane fi re resistant
Loose cushions:	Fibersilk 100%

Width:	86cm
Heigh:	90/100cm
Depth:	45cm
Seat heigh:	45cm
Arm heigh:	67cm
Back heigh:	49cm
Seat depth:	71cm

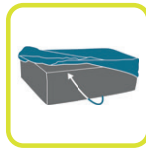

MEASURES

Made of shrink-wrapped plastic and cardboard box. The packaging is created at the same time as the design, optimising it so that it is easy to transport and takes up as little space as possible, avoiding the unnecessary use of packaging material.

96% RPET, 4%NY

Abrasion Resistance (ISO 12947) 90000
Pilling resistance (ISO 12945) 4 | Good
Dimensional stability (ISO 5077) 4 | Good
Rubbing fastness (ISO 105-X12) 4 | Good
Light fastness (ISO 105-B02) 4 | Good
Flame retardancy (BS 5852) Passes

100% PET

Abrasion Resistance (ISO 12947) 100000
Pilling resistance (ISO 12945) 4 | Good
Rubbing fastness (ISO 105-X12) 4 -5 | Good
Light fastness (ISO 105-B02) 4 -5 | Good
Flame retardancy (EN1021-1) Passes

CLEANING: Before washing the covers, it is essential to follow the manufacturer's washing instructions. In addition, it is advisable to turn them inside out, so that the zips or Velcro do not damage the good side of the upholstery during washing.

We recommend doing a test wash with a single cover before washing them all (as long as the upholstery allows washing).

CARE: With use, the seat padding may lose its firmness. For this reason we recommend, during the first month, to sit on the different pillows. This will ensure that the loss of firmness is uniform.

Due to the composition of the back cushions, they may initially be harder than they should be. We recommend shaking the cushions and back cushions so that the filling is evenly distributed, thus avoiding deformation.

In some cases, the fabric of seat and back cushions may show wrinkles. By running your hand over them and stretching the fabric, you can solve this problem.
