BRAINTRONICS®

Braintronics® technology synchronises your brainwaves through audio stimulation. Combined with a specially developed massage programme your stress-ridden body will be able to relax. No matter whether you'd like to relax, dream or learn – anything's possible.

SHIATSU
Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to simulate individual parts of the body and to mobilise the muscles.

3D MASSAGE
In this new technique, the massage robot not only moves upwards and downwards, but also forwards and backwards.

KNEADING
Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.

TAPPING
Short, tapping movements are performed with the edge of the hand, the palm or the fist. This promotes blood circulation in the skin and softens tense muscles. If tapping is performed at lung height, this can improve the release of mucus in the lung.

KNEAD & TAP (DUAL ACTION)
The techniques of kneading and tapping are combined in order to relieve tension and stimulate blood circulation at the same time.

ROLLING
Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.

CARBON HEATING
Deeply penetrating Carbon infrared heat, blood vessels expand, the blood flow increases and the muscle tone is reduced. In addition, it carries out a highly beneficial effect on nerve cells, which are responsible for reporting pain to the brain.

SOLE ROLLER
The foot massage stimulates the nerve endings and certain organs of the body, which also relaxes the muscles.

S-LINE
With this automatic program the massage heads are working very close to your body, they massage the whole back down to your buttocks. The S-shaped mechanic is constructed after the natural anatomy of the spine.

AIR COMPRESSION
Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.

ZERO SPACE
For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!

ZERO GRAVITY
You put yourself in the position of an astronaut – that "weightless feeling".
