Finish :

!WARNING!
DO NOT LIFT USING GLASS TOP
LIFT USING METAL FRAME

Ceramic care advice

Regular care advice “do”

One of the greatest advantages of a ceramic tabletop is how effortless it is to maintain. When it comes to cleaning, less truly is best. That means more time enjoying meals with family and friends—and far less time worrying about the clean-up afterward. If the surface looks a little messy, simply wipe it down with a damp cloth or sponge and a mild, diluted detergent (please ensure it is properly diluted). Yes, it really is that simple.

Regular care advice “don’t”

“You mean I don’t need to scrub it down or polish it every day?”
That’s correct. Ceramic is exceptionally durable and is scratch-resistant, but not scratch-proof. Use felt pads under decorative items and tableware. This means you can enjoy the beautiful appearance of your ceramic table without the constant maintenance that other materials often require.

Other care advice

We know the tables are heavy but try not to drag them as you risk damaging your floor.
Ensure you are helped by when moving the table.
Occasionally, maybe once every 1 or 2 year’s (depending on use) the bolts on the table could do with a quick tighten.

**Finally, we hope you enjoy
your furniture for many years
to come and thanks again for
your purchase.**
