- Fitted with castors
- Chest freezer with hinged solid lid
- Robust cabinet structure and foamed lid
- Customised hinged design for lid
- Embossed metallic inner liner
- Efficient cooling and insulating system with solid lid
- R290 Refrigeration
- Fitted 13 amp UK plug

OVERVIEW

The **Contender 655L Twin Lid Chest Freezer** is a high-capacity, heavy-duty solution designed for busy commercial kitchens that demand both space and efficiency. With an impressive 655-litre gross capacity (607L net), it provides ample storage for bulk frozen goods, making it ideal for catering environments where reliable, large-scale freezing is essential.

Engineered for performance and energy efficiency, the twin lockable stainless steel lids allow operators to access one side at a time, minimising cold air loss and helping maintain consistent internal temperatures. The counterbalanced lids are easy to lift and safely hold at multiple positions, with a self-closing function to ensure a secure seal during day-to-day use.

Built with durability and practicality in mind, the unit features a robust cabinet construction, interior LED lighting for clear visibility, and castors with brakes for easy movement and positioning. Combined with a wide temperature range of -18°C to -34°C and reliable insulation, it offers a dependable and efficient freezing solution for demanding commercial settings.

SPECIFICATIONS

Product Dimensions	2055mm (W) x 722mm (D) x 907mm (H)
Product Weight	99 kg
Packaged Dimensions	2085mm (W) x 752mm (D) x 937mm (H)
Packaged Weight	110 kg
Power Requirements	220-240 V / 50Hz / 13 Amp

Due to continuous ongoing improvements, the item may differ slightly from the image shown.
